

8 Easy Steps to configure your Accurize shooting system

Step 1:- Download the Mobile App from the link below(tap the picture)

Step 2:-Open the App

Accept the Terms and Conditions

Note-Language is automatically detected but you can change it from here if needed

Step 3:-Register as a new user

Step 4:-Now log in to the app

Step 5:-Now press the button on the shooting system to switch it on (See screenshot)

Note- You need to keep it pushed until the red lamp lights up

Step 6:- Now add your target to the app, follow these manual steps

Adding A Target

Tap the dots up in right corner and select 'Settings' to create a new target.

Tap targets

Tap the "+" sign up in the right corner

Accurize App Manual

2023-16-03

Tap the white screen

Tap the target you want to make

Note: Once a session has been recorded for a firearm the target type, session length cannot be altered.

- Choose session
- > length/time
- > shot sound
- > shot inhibit (block the target from receiving hit)
- > shot type(PRO app)
- > Start sound for reaction display (PRO app)

Scroll down on the page for manual sight adjustments. Tip mm or drag the cursor. Go back with the arrow up left corner to the home page.

Many of these features are explained through film clip in the manual section or in youtube.com - Search Accurize.

Go back to the start page by tapping the arrow in the upper left corner.

Step 7: When back on the start page Click on the three dots on the app upright

Click on Connect to Target button

And it will open a scanner and it will start scanning the system

Your shooting system is connected to the app when “start session” appear.

Step 8. Calibrate your sight

Click on the three dots on the app upright

Tap sight adjustment and a green line appear on the bottom of the screen

Shot one good shoot on the target and it will calibrate, the green line will disappear and the start session will appear on the bottom.

Tap session and you are good to go!

Enjoy your first Training session! 😊

You can download the full Manual From here (I recommend you do this so that you can get all your answers in the manual in future) [FULL USER MANUAL](#)
